Digital Sovereignty and Long-Term Transformation

We deliver solutions that are compliant, adaptable and built for mission success.

Strategic ICT Solutions

Odyssey Group is a proudly South African technology company delivering secure, scalable and intelligent ICT & A.I. services to National Defense, Public and Private Strategic Sectors. We specialise in designing, deploying and supporting infrastructure that enables operational resilience, digital sovereignty and long-term transformation.

Whether supporting tactical deployments, base infrastructure or enterprise-scale operations, Odyssey Group delivers solutions that are compliant, adaptable and built for mission success.

+ Our Vision

To be the leading provider of intelligent ICT & A.I. solutions that empower strategic organisations to operate securely, efficiently and with confidence.

Our Mission

Our mission is to empower organisations operating in high-security environments with future-ready technology that enhances agility, performance and control.

Our Values

- *Integrity* – We operate with transparency, accountability and respect.
- *Excellence* – We pursue quality in every solution, service and interaction.
- *Innovation* – We embrace emerging technologies to solve complex challenges.
- *Resilience* – We build systems that endure, adapt and perform under pressure.
- *Insight* – We align technology with strategy to deliver measurable impact.

Infrastructure & Connectivity

We design and deploy robust, high-performance networks that support secure communications across operational bases, headquarters and remote deployments.

- Campus-wide wired and wireless networks
- Private 5G for secure, high-speed site coverage
- SD-WAN architecture for flexible, resilient data routing
- Structured cabling and network optimisation
- Remote monitoring and management systems for IoT and CCTV

Cybersecurity & Threat Management

Our cybersecurity solutions protect sensitive data and systems from evolving threats, ensuring compliance with defence-grade standards.

- Advanced threat detection and breach prevention
- Endpoint protection and firewall management
- Security audits and vulnerability assessments
- SASE frameworks for cloud-centric environments
- Compliance with Cyber Essentials, FIPS 140-2 and ISO-aligned protocols

Managed & Co-Managed IT Services

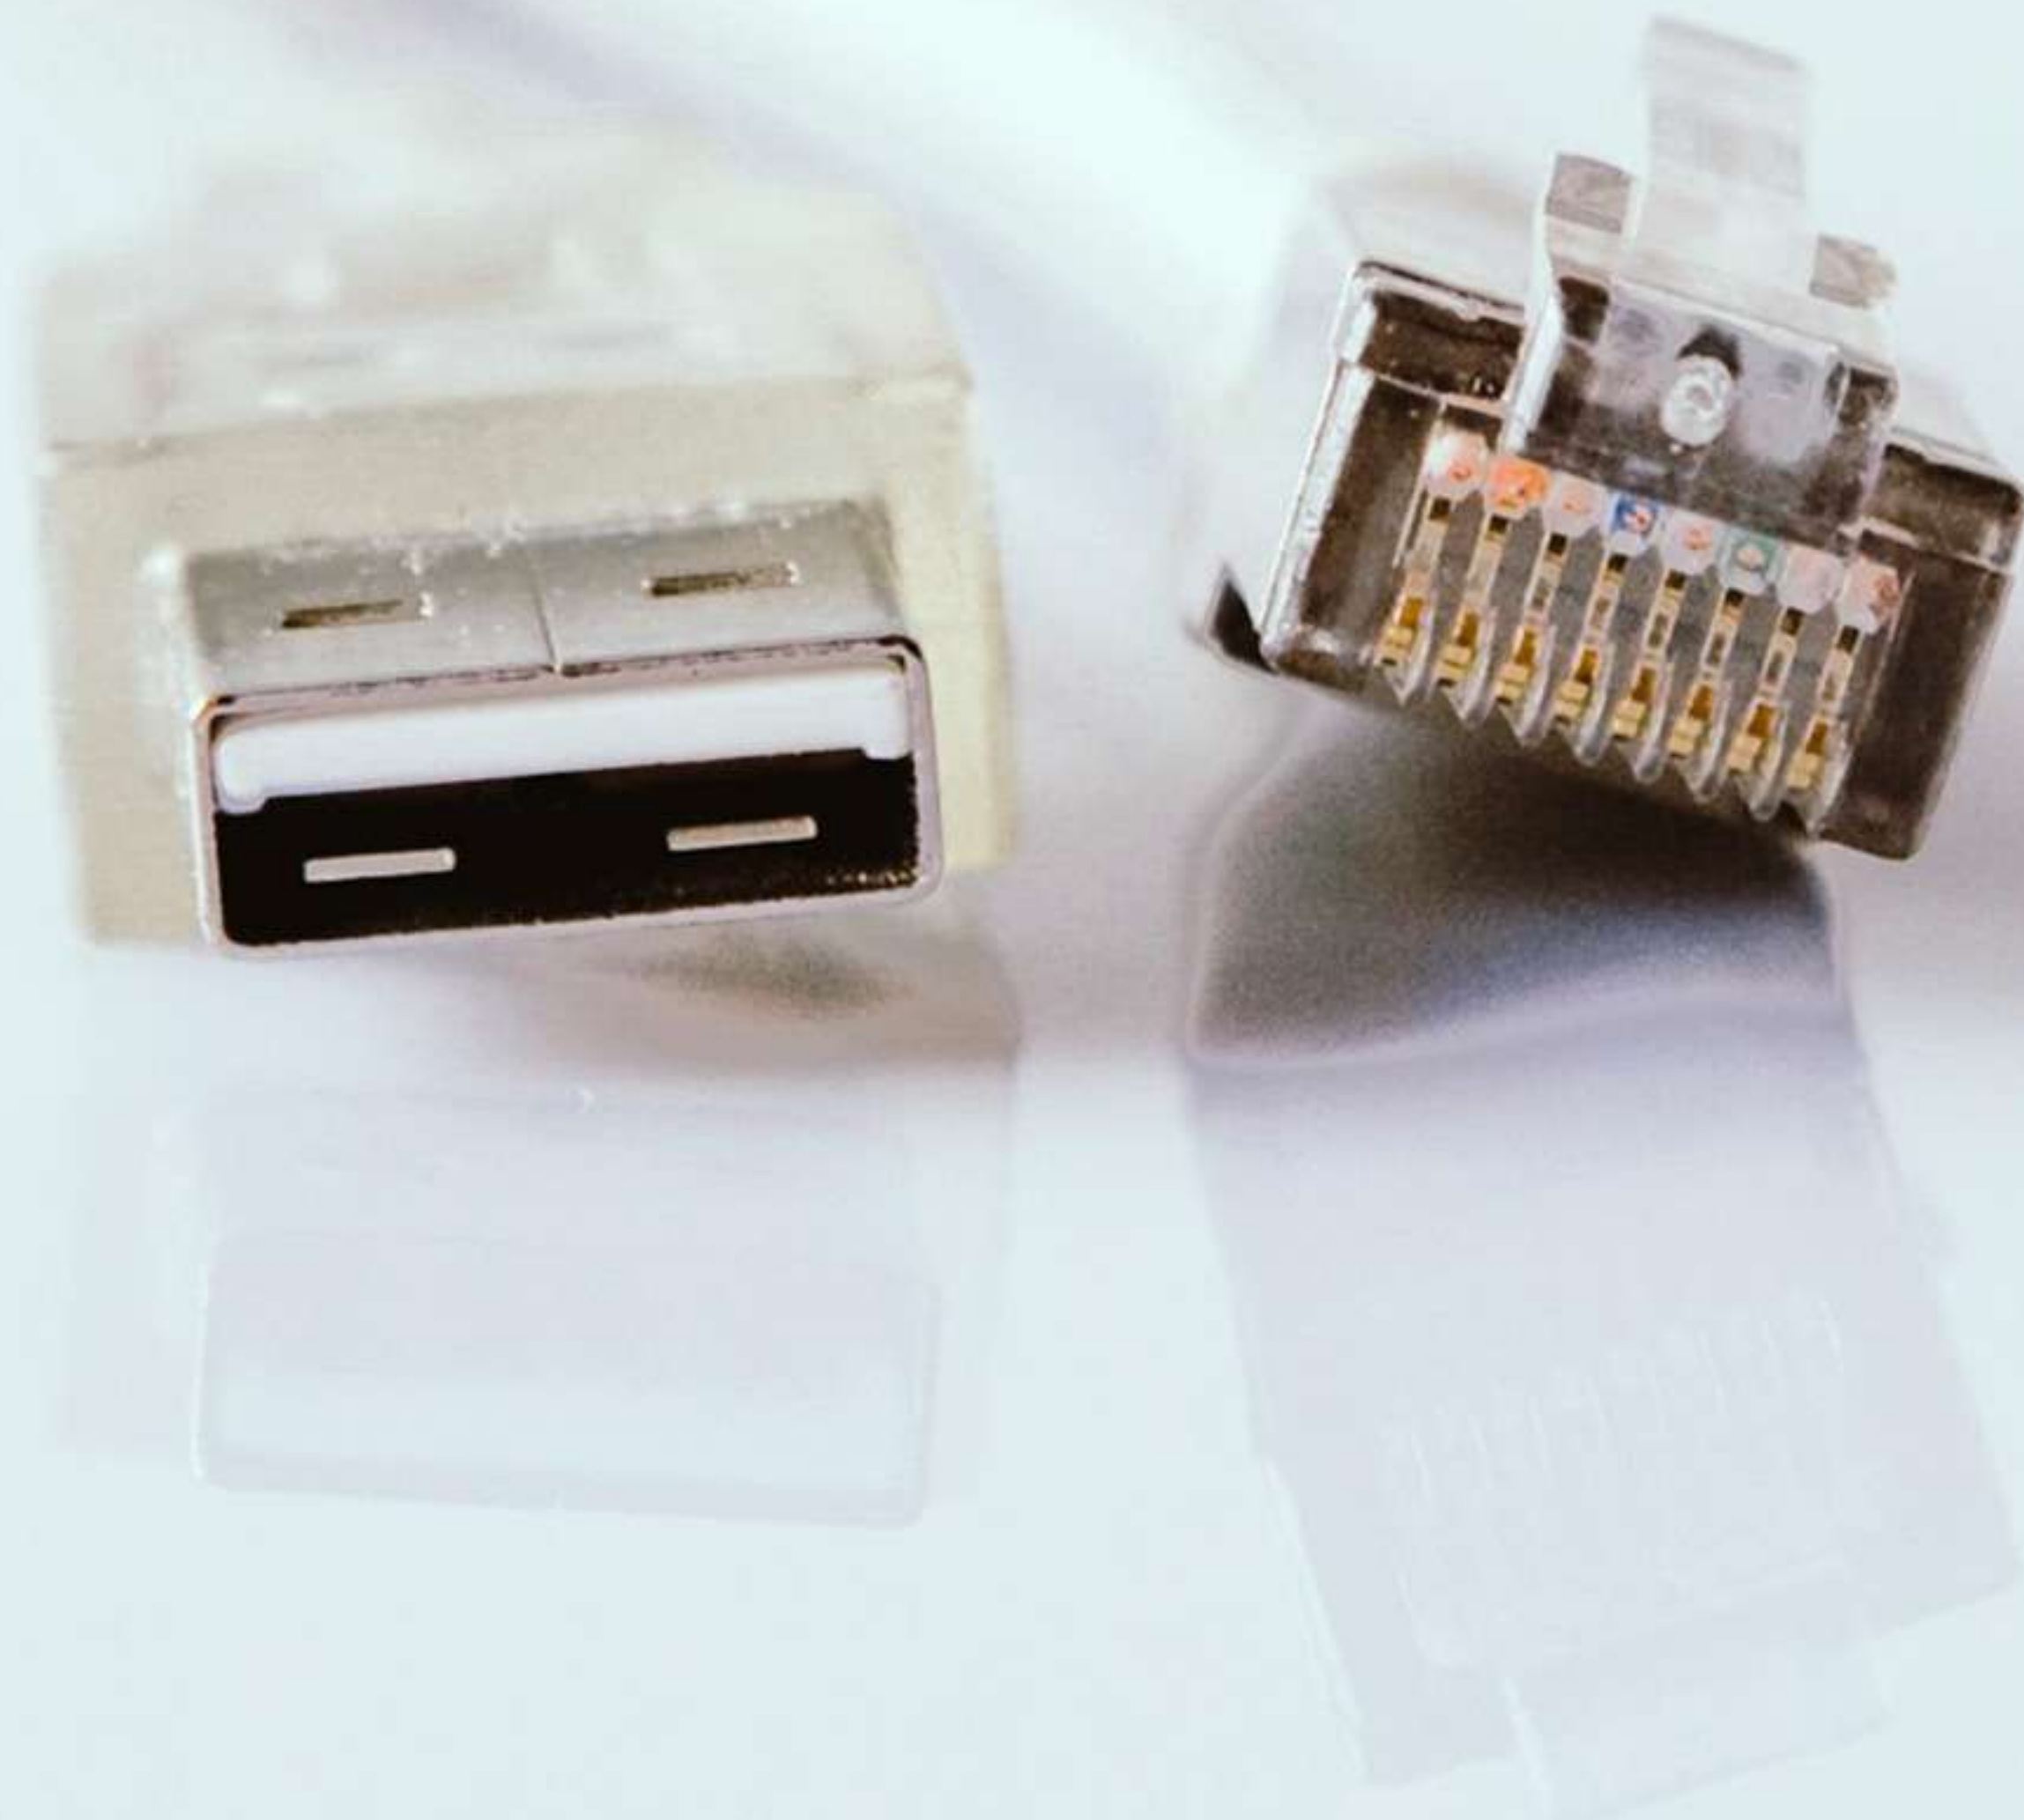

We offer flexible support models tailored to defence operations, from fully outsourced IT departments to co-managed environments that enhance internal capabilities.

- 24/7 service desk and infrastructure monitoring
- Unlimited remote and on-site support
- Device management and patching
- Quarterly strategic reviews and performance reporting
- SLA-driven service delivery

Secure Infrastructure. Strategic Advantage.

Every strand, every connection, every bit of data flowing through the secure networks we build contributes directly to the strategic advantage of our partners.

Strategic ICT Consulting

Our consulting services help organisations align technology with mission objectives, improve operational efficiency and plan for future growth.

- Virtual IT Director services
- Technology roadmapping and budgeting
- Infrastructure audits and risk assessments
- Advisory on procurement, compliance and digital transformation

Cloud & Data Solutions

We provide secure, scalable cloud environments and data management systems that support continuity and agility.

- Cloud migration and hybrid integration
- Backup and disaster recovery using the 3-2-1 rule
- Data lifecycle management and analytics platforms
- Business continuity planning and implementation

Defence-Grade Hardware & Platform Engineering

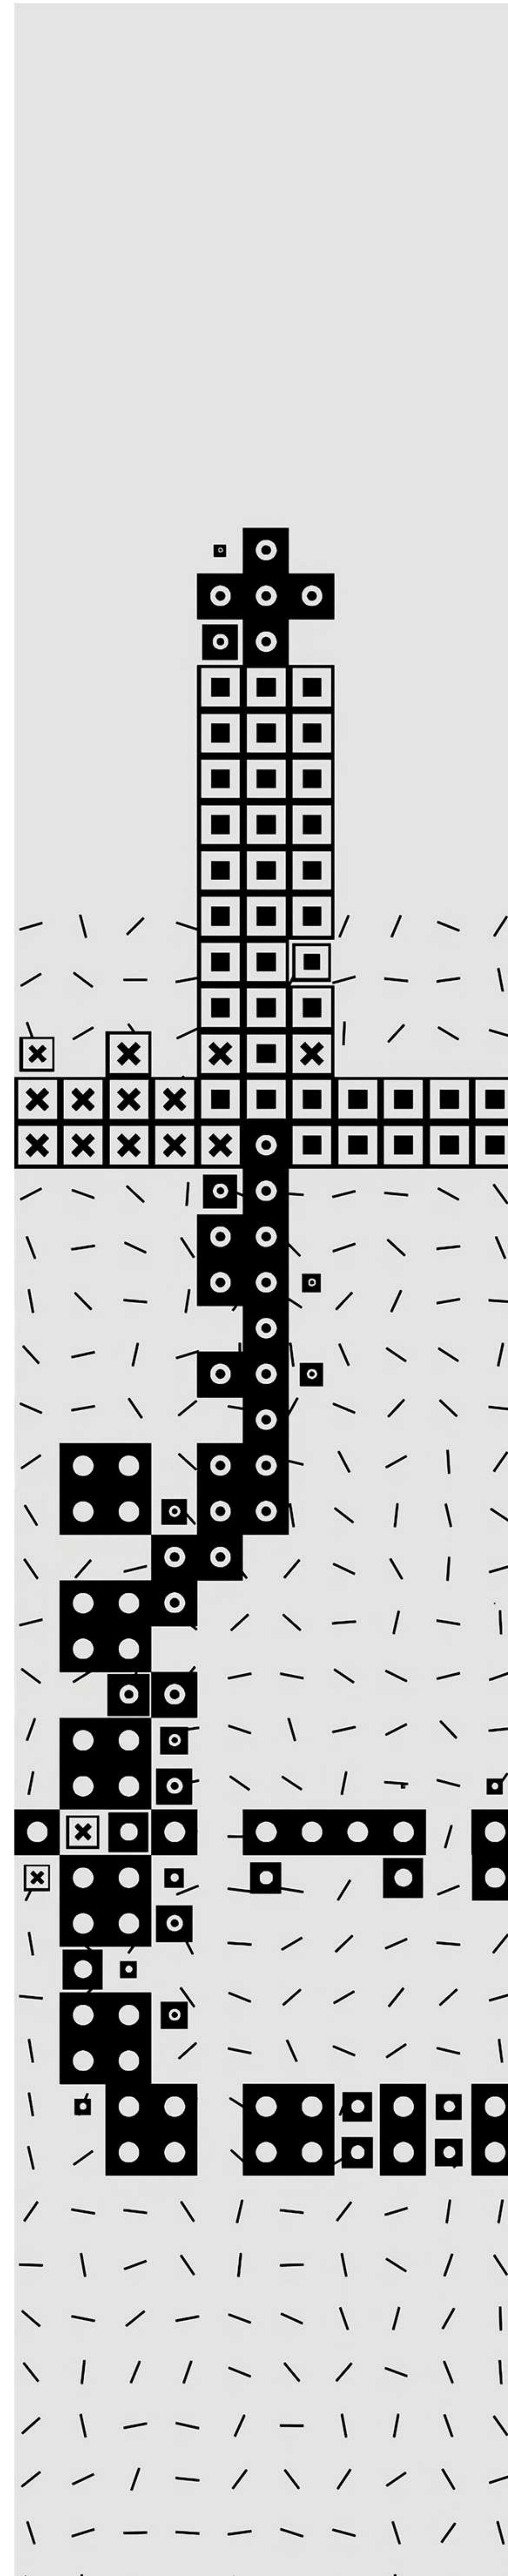

We supply and support specialised hardware platforms tailored to defence and strategic use cases.

- Procurement and lifecycle support for mission-critical devices
- Simulation and training platforms
- Asset tracking and performance optimisation
- Warranty management and hardware audits

ICT Audit & Assessment Services

Our audit services provide a detailed view of your current ICT environment, identifying risks, inefficiencies and opportunities for improvement.

- Backup coverage and recovery time analysis
- Firewall and patch status evaluation
- Hardware age and warranty tracking
- Software standardisation and licensing review
- Remote access and password policy assessments

Architecting Operational Resilience.

We maintain command through any digital or physical challenge.

Government & Public Sector

Odyssey Group delivers ICT services to national and provincial departments, enabling digital transformation, secure communications and infrastructure modernisation.

- Secure cloud integration and hybrid environments
- Endpoint protection and network resilience
- Strategic consulting and lifecycle planning
- Compliance with public sector frameworks

High-Security Corporate Enterprises

We provide ICT services to private sector organisations operating in regulated industries with elevated security requirements.

- Managed IT services and co-managed support
- Cybersecurity and threat detection
- Business continuity and disaster recovery
- Infrastructure optimisation and performance monitoring

Defence & Military Operations

We support tactical deployments, base infrastructure and command centres with secure, scalable and resilient ICT systems. Our solutions are designed to enhance operational readiness, protect sensitive data and enable real-time decision-making.

- Smart base connectivity and remote monitoring
- Tactical communications and secure data platforms
- Simulation and training environments
- Compliance with defence-grade standards

Strategic Procurement & Oversight Bodies

We support agencies responsible for defence procurement, logistics and oversight with systems that ensure transparency, accountability and operational efficiency.

- ICT audit and infrastructure assessment
- Asset tracking and lifecycle management
- Data analytics and reporting platforms
- Secure access and identity management

Training Institutions & Simulation Centres

Our solutions enable defence academies and simulation centres to deliver immersive, secure and scalable training environments.

- High-performance hardware and simulation platforms
- Network infrastructure for real-time collaboration
- Device monitoring and patch management
- Scalable environments for multi-user training

Powering Africa's Strategic Digital Future.

We are committed to fortifying the nation's most vital sectors.

ESG & Sustainability

Transparent Reporting

We maintain transparent reporting practices, providing stakeholders with clear insights into our operations, financial performance, and adherence to regulatory standards.

Ethical Supply Chain

Odyssey prioritizes ethical sourcing practices, ensuring that our supply chain aligns with fair labor practices, environmental responsibility, and human rights.

Corporate Governance

We uphold high standards of corporate governance, promoting accountability, transparency, and ethical conduct at all levels of our organization.

Innovation for Sustainability

Odyssey fosters a culture of innovation, continually exploring and implementing sustainable technologies and practices within our operations.

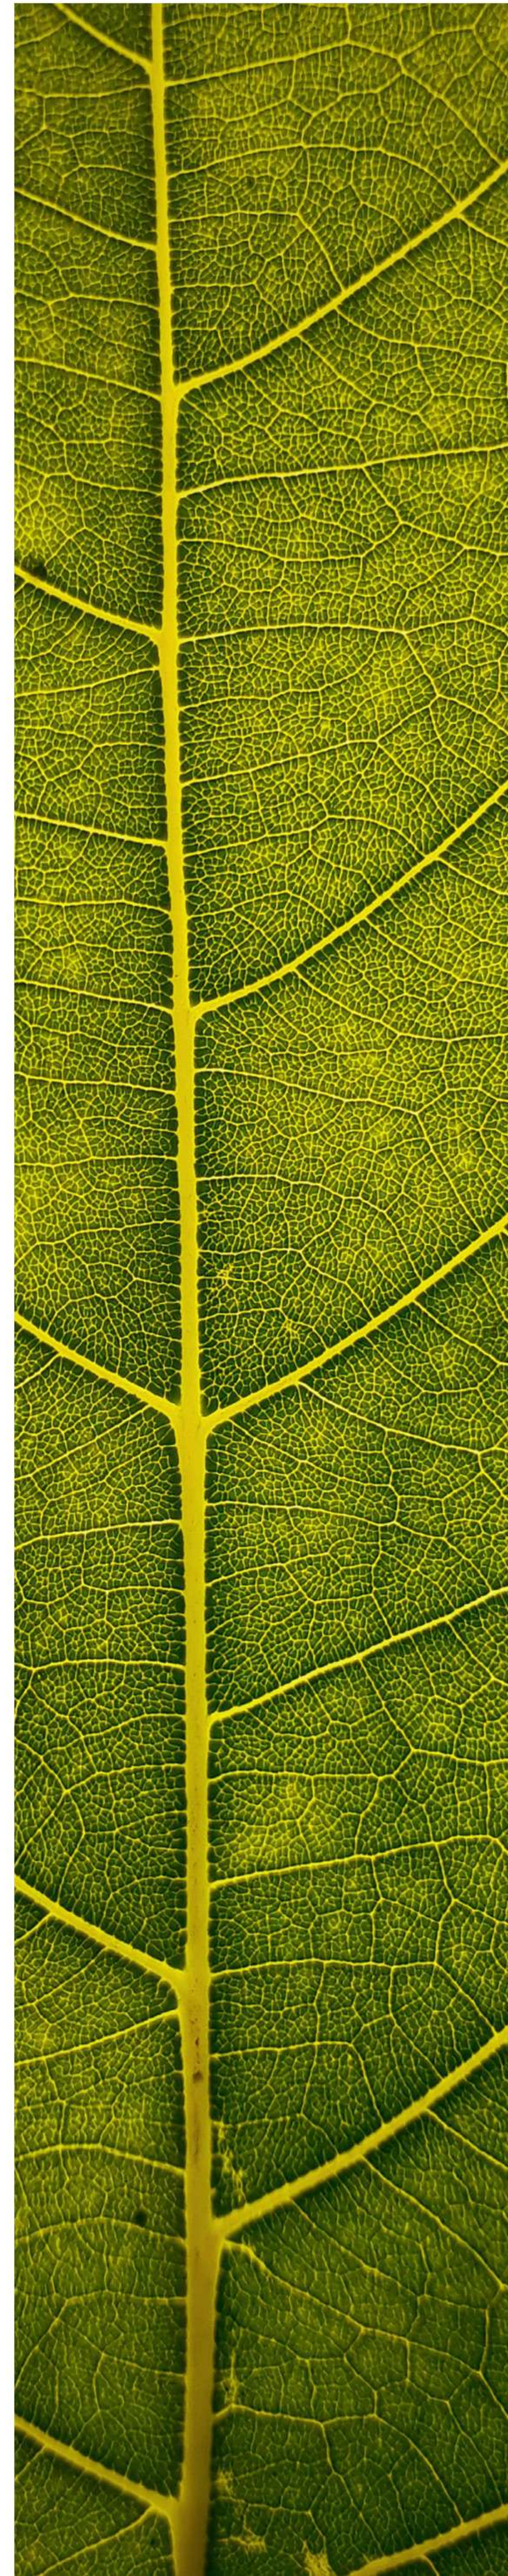

Stakeholder Engagement

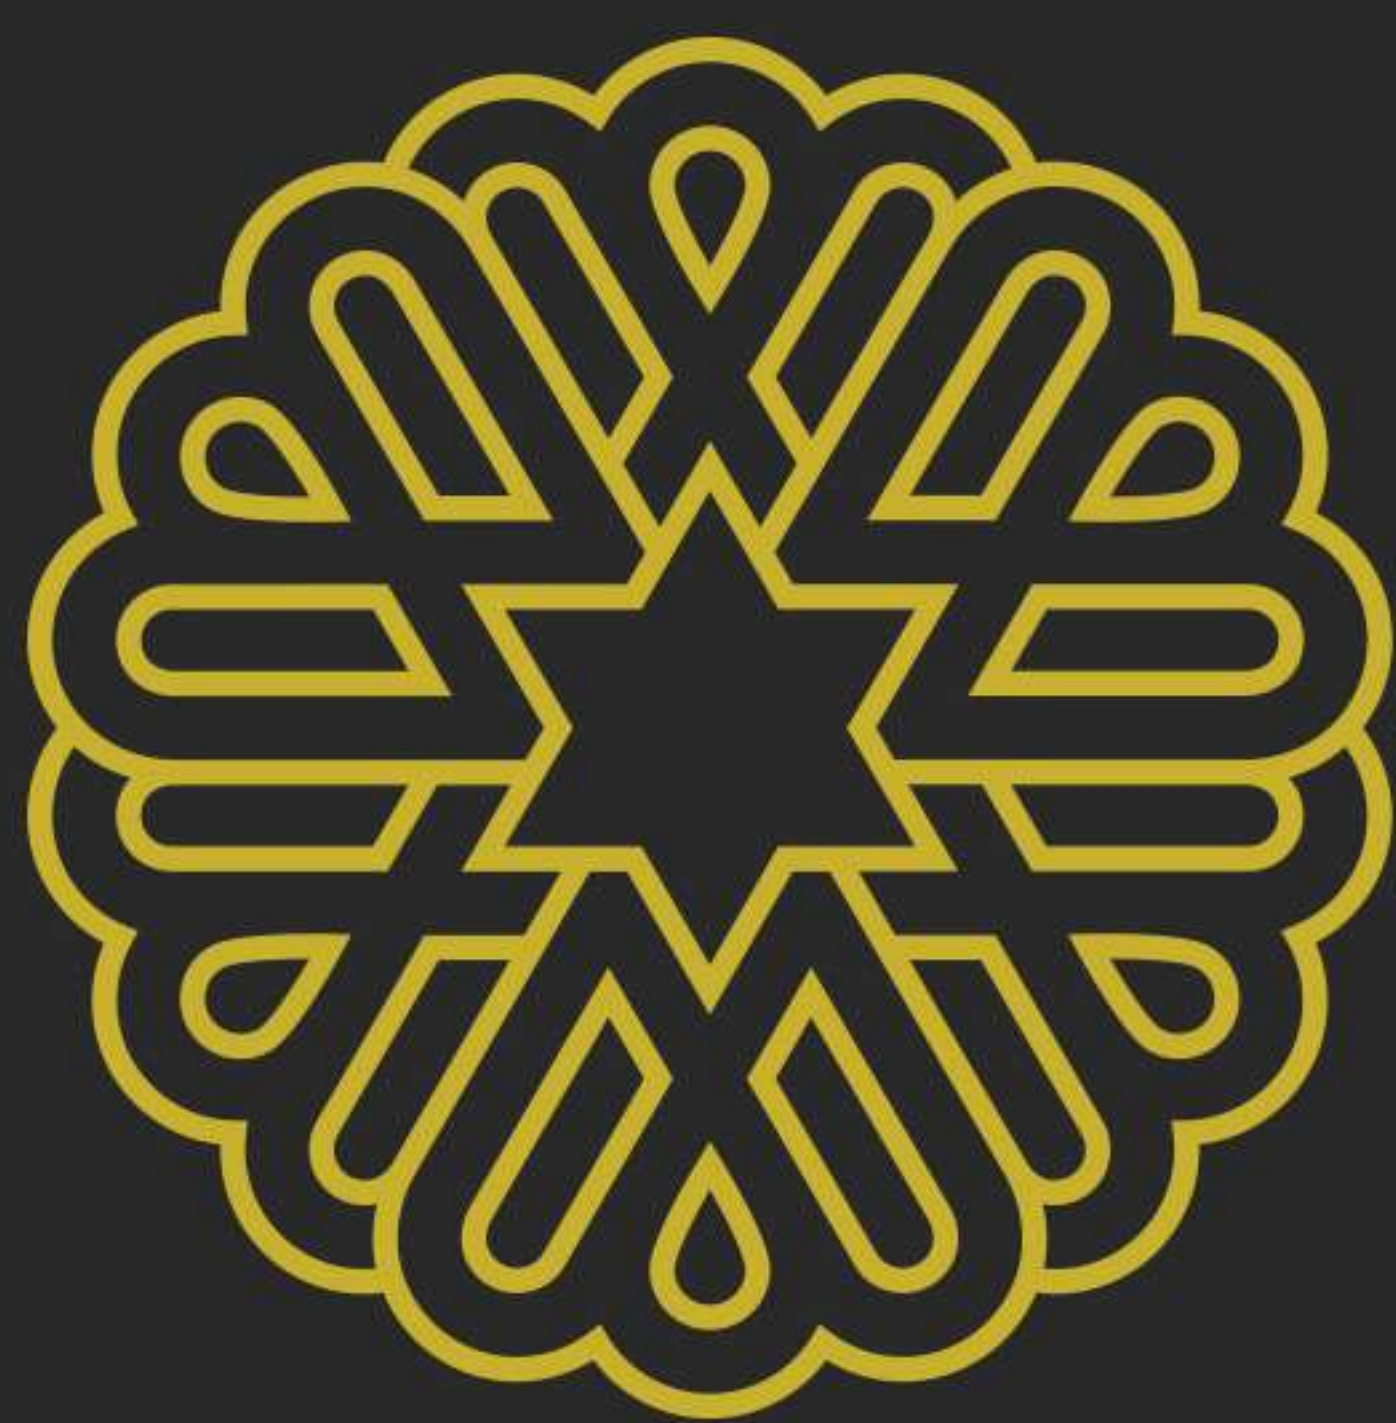

We actively seek input and feedback from our stakeholders, considering their perspectives in decision-making processes and fostering collaborative approaches to sustainability.

Looking Ahead

Odyssey is committed to evolving our ESG and sustainability practices, aligning with emerging global standards and industry best practices.

Together, we aspire to lead the way in sustainable technological solutions, contributing to a more resilient and sustainable world.
